Bootear con Ventoy (Ejecutar)

La presente receta tiene como objetivo mostrar cómo correr el ejecutable para Ventoy en cualquier dispositivo de almacenamiento.

1.- Ingrese el dispositivo de almacenamiento al computador.

2.- En el navegador de su preferencia ingrese a la página oficial de Ventoy (<https://www.ventoy.net/en/index.html>).

The screenshot shows a Google search results page with the query "ventoy". The top result is a link to the Ventoy website, which is highlighted with a red box. The page content includes a brief description of Ventoy as an open-source tool for creating bootable USB drives, followed by sections for "Downloads", "Tested ISO", "Install Ventoy", "Document", and "FAQ". To the right of the search results, there is a sidebar with the Ventoy logo, a brief description of the software, and information about its release date (March 10, 2020), license (GPLv3), and type (open-source software). The background features large, semi-transparent circular graphics.

3.- Ingrese a la sección de descargas “Downloads”.

The screenshot shows the Ventoy website's main navigation bar. The 'Downloads' button is highlighted with a red box. Other menu items include Main page, Screenshots, Document, Tested ISO, Experience Sharing, Plugin, FAQ, Forums, Donation, and 中文 (Chinese).

What is Ventoy

Ventoy is an open source tool to create bootable USB drive for ISO/WIM/IMG/VHD(x)/EFI files.

With ventoy, you don't need to format the disk over and over, you just need to copy the ISO/WIM/IMG/VHD(x)/EFI files to the USB drive and boot them directly.

You can copy many files at a time and ventoy will give you a boot menu to select them ([Screenshot](#)).

You can also browse ISO/WIM/IMG/VHD(x)/EFI files in local disks and boot them.

x86 Legacy BIOS, IA32 UEFI, x86_64 UEFI, ARM64 UEFI and MIPS64EL UEFI are supported in the same way.

Most types of OS supported (Windows/WinPE/Linux/ChromeOS/Unix/Vmware/Xen...)

1200+ image files are tested ([list](#)), **90%+** distros in [distrowatch.com](#) supported ([details](#)).

Features

4.- Seleccione el archivo para el sistema operativo que posea; en este ejemplo seleccionamos Linux.

The screenshot shows the Ventoy website's file download page. A red box highlights the 'ventoy-1.1.05-linux.tar.gz' file entry, which has a SHA-256 hash of 379c99890359dcff55aab7f7b3286f87c988d1da2fd616e6a9e305fb0a1de9e. The table includes columns for File, SHA-256, Released, and Size. Other files listed are 'ventoy-1.1.05-windows.zip' and 'ventoy-1.1.05-livecd.iso'.

File	SHA-256	Released	Size
ventoy-1.1.05-windows.zip	3dc1f0a5209c6fa260af9f08951bc4421127b56d4efa3edd2c979af74b1941e5	2025-02-24	15 MB

5.- Seleccione el archivo para Linux y chequee el proceso de descarga.

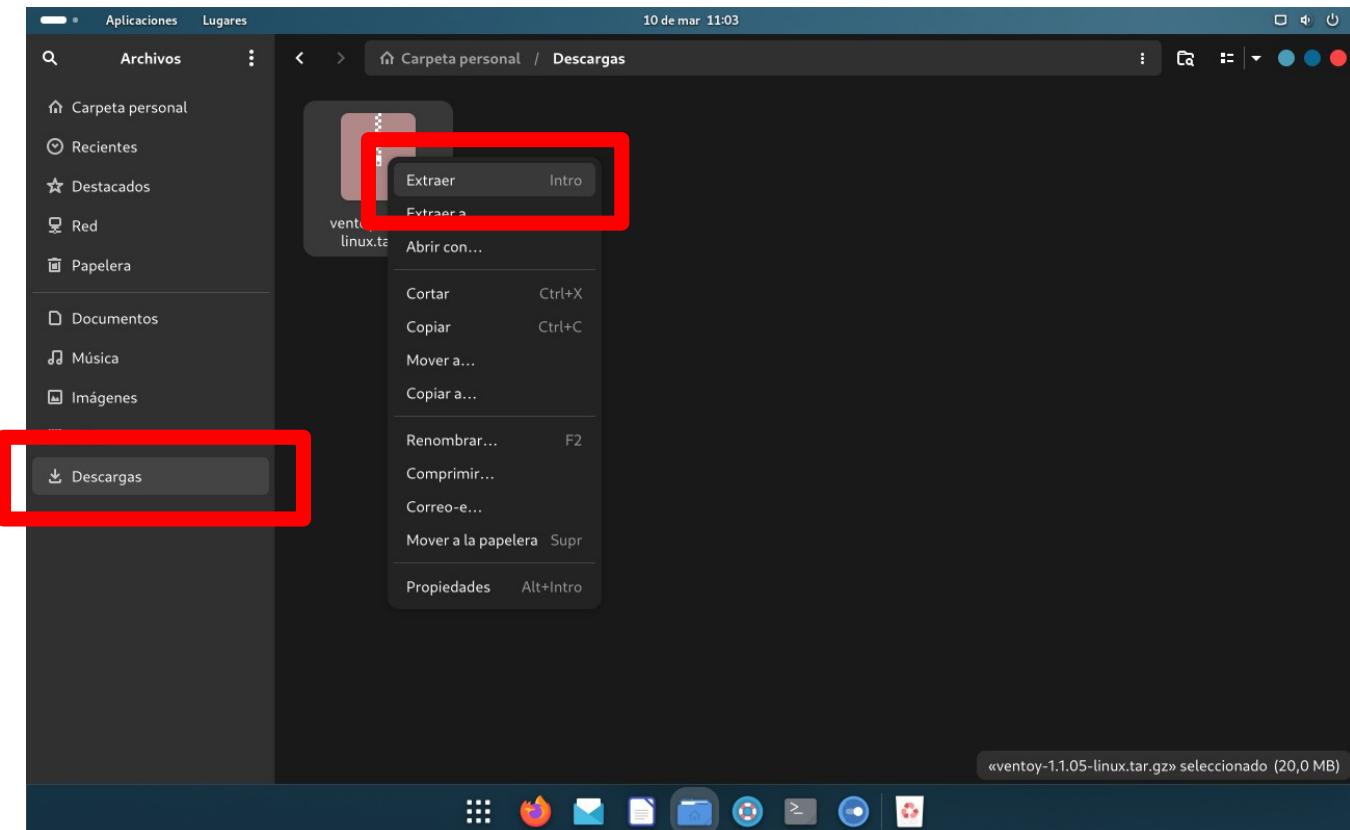

The screenshot shows the SourceForge project page for Ventoy Files. At the top, there's a navigation bar with links for Business Software, Open Source Software, SourceForge Podcast, Resources, and a search bar. A banner for 'fastly' is visible. The main content area shows the 'Files' tab selected, displaying a list of files. A red box highlights the file 'ventoy-1.1.05-linux.tar.gz'. Below the file list, there's a note about fixing a resolution issue for Windows/WinPE ISO in UEFI mode. To the right, there's a sidebar titled 'Recommended Projects' with entries for AWS, Clonezilla, and Apache OpenOffice.
